Computer Science
Oct 2021 - Current

Summary

I am a driven frontend developer with a passion for crafting elegant and user-centric web applications using cutting-edge technologies. Currently, I am in my last year of studies and have two years of experience in web development. I am seeking dynamic projects to collaborate on with talented teams.

Experience

Junior Frontend Developer

Zoovu | Wroclaw, PL | Jul 2022 - Oct 2022

- Contributed to the design and production process
- Worked alongside experienced developers in building consistent and reusable components with React
- Conducted code reviews with team members before deployment
- Key contributions include completing the component library on storybook, writing and editing documentation, ensuring accuracy and completion of guides for the target audience.

Senior Digital App Operator

Carlcare Development | Lagos, NG | May 2018 - Aug 2021

- Played a key role in understanding and testing application requirements
- Provided feedback on design and functionality, ensuring that the application met user needs
- Ran tests, identified and resolved issues with the development team, monitored user feedback and engagement
- Notable contributions include significantly increasing the number of users on the application, improving retention rates and enhancing the overall application performance.

Software Product Tester

Infinix Mobility | Lagos, NG | Feb 2015 - Apr 2017

- Conducted a variety of tests, including functional, performance, usability, and compatibility tests, to ensure the proper functioning of smartphones and software releases
 - Performed durability tests to assess the resilience of smartphones to normal wear and tear
 - Conducted performance and benchmark tests to meet company standards
 - Collaboration with the R&D team ensured that smartphones and software met user needs and that any issues were promptly addressed.
